

Step 3b: Neuron Ablation Tests

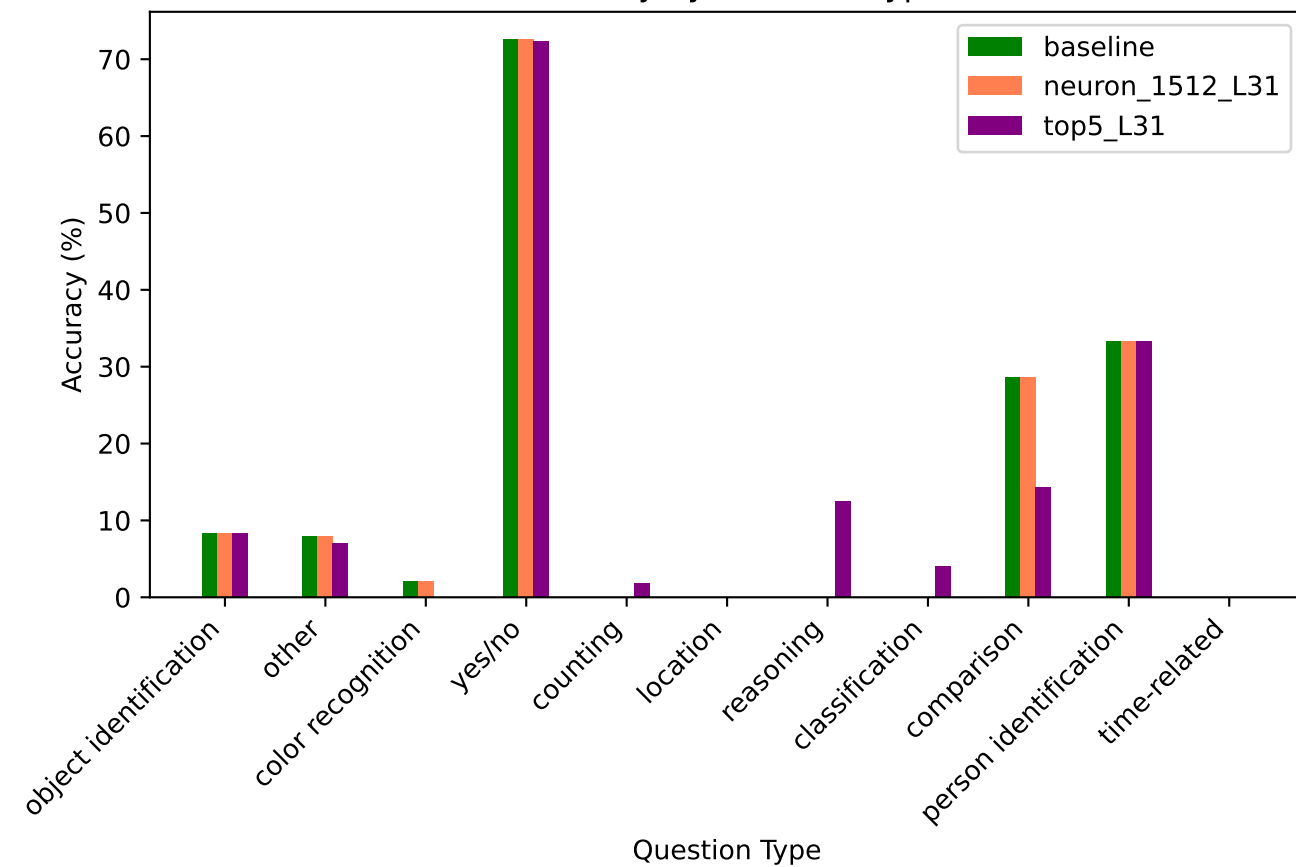

Overall Accuracy by Ablation

Accuracy Drop from Baseline

Accuracy by Question Type

ABLATION TEST SUMMARY

Baseline accuracy: 32.1%

Key findings:

1. Neuron 1512 (Layer 31) ablation:
Accuracy drop: 0.0%
2. Top 5 neurons ablation:
Accuracy drop: 0.4%
3. Random 5 neurons (control):
Accuracy drop: 0.0%

Task-specificity:

- Most affected: object identification (0.0% drop)
- Least affected: object identification (0.0% drop)

Interpretation:

No significant causal effect detected.
