

Visual-Layer-Only Attribution Analysis

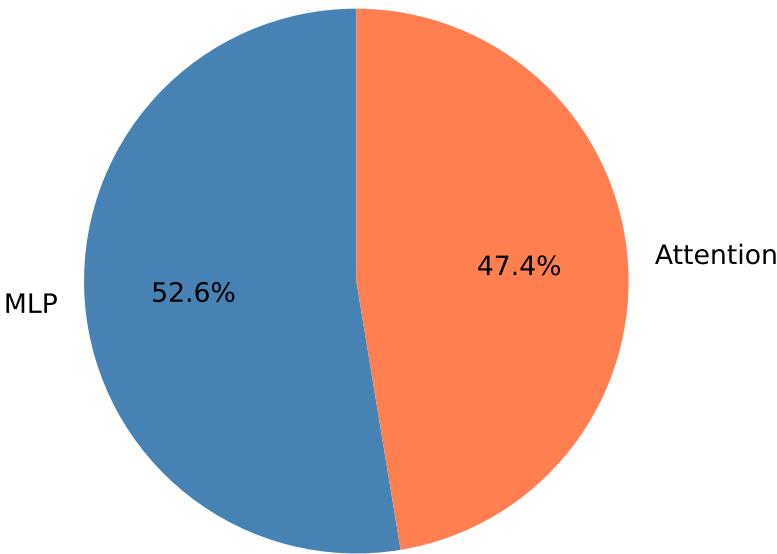

Visual Impact per Layer

MLP vs Attention (Visual Layers Only)

Attribution in Visual Layers Only
(Layers [19, 21, 22, 23, 24, 25, 26, 27, 28, 30, 31])

VISUAL-LAYER ATTRIBUTION SUMMARY

Visual layers identified: 11
($|\Delta\text{margin}| > 0.5$)

=== IN VISUAL LAYERS ONLY ===

MLP contribution: +4.68 (52.6%)
Attention contribution: +4.22 (47.4%)

=== ACROSS ALL LAYERS ===

MLP contribution: +3.50 (39.3%)
Attention contribution: +5.41 (60.7%)

=== KEY INSIGHT ===

MLP dominates visual processing!

In layers where the image matters:
- Attention contributes 47.4% of visual signal
- MLP contributes 52.6% of visual signal

This confirms that visual information flows primarily through MLP mechanisms.
